List of Recipes	ix	18
Foreword	xi	19
About this Book	xiii	21
About the Authors	xv	23
Acknowledgments	xix	24
Symbian OS Code Conventions and Notations Used in the Book	xxi	25
		26
		27
		28
		29
1 Introduction and Setup	1	30
1.1 Tools: What You Need and Where to Find It	1	31
1.2 While You are Waiting	3	32
1.3 Post-Installation	6	33
		34
2 Quick Start	9	35
2.1 Hello World Project Template	9	36
2.2 Running Carbide.c++ IDE	9	37
2.3 Generating the Hello World Project	10	38
2.4 Building the Hello World Project	13	39
2.5 Running the Hello World Application on the Emulator	14	40
2.6 Running the Hello World Application on the Device	16	41
2.7 Modifying the Hello World Project	18	42
2.8 Advanced Topics on Carbide.c++	21	43
2.9 Links	26	44
		45

3	Symbian OS Development Basics	29	1
3.1	Fundamental Data Types on Symbian OS	29	2
3.2	Symbian OS Class Conventions	30	3
3.3	Leaves and Exception Handling	33	4
3.4	The Cleanup Stack	36	5
3.5	The Cleanup Stack FAQ: Advanced Information	38	6
3.6	Two-Phase Construction	40	7
3.7	Thin Templates	42	8
3.8	Descriptors – Symbian OS Strings	44	9
3.9	Arrays on Symbian OS	54	10
3.10	Executable Files	58	11
3.11	Platform Security: Capabilities	60	12
3.12	Platform Security: Data Caging	62	13
3.13	Stack Size and Heap Size	62	14
3.14	Streams	63	15
3.15	Active Objects	65	16
3.16	Threads	73	17
3.17	Timers and Callbacks	74	18
3.18	Summary	75	19
			20
4	Symbian C++ Recipes	77	21
4.1	File Handling	78	22
4.2	Contacts and Calendar	106	23
4.3	Networking	136	24
4.4	Messaging	172	25
4.5	Graphics and Drawing	194	26
4.6	3D Graphics Using OpenGL ES	217	27
4.7	Multimedia	236	28
4.8	Telephony	263	29
4.9	Connectivity	282	30
4.10	Location-Based Services	299	31
			32
5	Next Level Development	319	33
5.1	Advanced Technologies	319	34
5.2	Symbian Partners Only	325	35
5.3	Advanced Application Deployment	326	36
			37
6	Releasing Your Application	329	38
6.1	What To Do Before You Release Your Application	329	39
6.2	How To Distribute Your Application	341	40
6.3	Where To Go Next	345	41
			42
Index		351	43
